FOR IMMEDIATE RELEASE
November 16, 2020

Borough to Close or Limit Access to Certain Departments Until Further Notice

Due to a positive exposure to COVID-19, the Borough of Greencastle has closed the Public Works department and initiated modified schedules with limited public contact at the Waste Water and Water Treatment plants. These actions are in keeping with CDC recommendations and Pennsylvania Department of Health (PA DOH) protocols and post no impacts to the overall operating infrastructure of the borough.

“The Borough continues to maintain the highest possible standards for our staff and those persons they come in contact with on a daily basis. We have stringent practices in place such as social distancing, daily sanitizing and mask requirements for entrance to the office. These measures will continue.

Having identified a positive exposure to COVID-19, we have determined that the safest course of action is to quarantine select staff and limit contact with others. The administrative office is not impacted by this event and remains open with regular business hours,” said Assistant Borough Manager Emilee Little.

The closure of Public Works will mean that various projects will be on hold indefinitely, including the current leaf collection program. Services such as 811 calls, meter reads and other maintenance requests will continue to be processed as necessary. Added Little, “the borough will continue to provide public works coverage as necessary. We ask that residents be patient with our delays and continue to reach out through the borough office for any specific needs or questions.”

Questions regarding this information can be directed to the borough at 717-597-7143 or via email at office@greencastlepa.gov.
